Brendan Cordova

Summary

SOFTWARE ENGINEER

Versatile Full Stack Web and Mobile Software Engineer, skilled in leading teams within Kanban frameworks and adept at product management. Thrives on crafting engaging frontend experiences. Passionate about coding, mentoring, continuous learning, and making valuable contributions to the community. Proven track record of delivering high-quality solutions, adding significant value to projects and teams.

Professional Experience

Ramsey Solutions - Full Stack Software Engineer

10/2023 - Current

- **Project Leadership:** Led database, web framework, and API development projects, showcasing strong project management skills.
- **Versatile Coding Proficiency:** Developed high-level and low-level code, maintaining expertise in various programming languages.
- **Software Installation and Debugging:** Installed front-end and back-end software applications, efficiently performed bug fixes.
- **Product Analytics:** Used various software services that monitor health and wellness of the applications
- **User-Centric Design Skills:** Developed high-level, user-friendly designs for stunning user experiences, contributing to enhanced product aesthetics and usability.

Sojourn Creations (Startup) - Software Engineer

05/2023 - Current

- **Agile Project Management:** Implemented Kanban methodology and Jira for streamlined project workflows, optimizing task prioritization and team collaboration.
- **Innovative AI Integration:** Integrated GPT-4.0 AI technology into a dungeon master experience, introducing text-to-speech functionality for enhanced user engagement.
- **Live Chat Application Development:** Led the development of a live chat application, fostering real-time communication and collaboration among users for improved engagement.
- **Cross-Platform Application Development:** Designed and built a mobile application replicating web app functionality, ensuring a seamless user experience across various platforms.
- **Security and User Authentication Management:** Orchestrated OAuth and secure user authentication processes, fortifying data protection and enabling seamless authentication via our database, Google, and Facebook.

Books Beats Box (Startup) - Lead Full Stack Developer

01/2023 - 10/2023

- **Full-Stack Development Management:** Oversaw both Backend and Frontend development, ensuring comprehensive project management.
- **Wireframe Implementation and Animation:** Translated Figma wireframes into responsive, animated, and data-driven applications, showcasing design-to-development proficiency.

Colorado Technical University - Full Stack Software Engineer

05/2022 - 10/2023

- **Curriculum Collaboration:** Collaborated with the development team on curriculum and learning platform enhancements.
- **Digital Tool Construction:** Built digital tools for student learning and process optimization, contributing to streamlined educational workflows.
